

AVAILABLE TODAY

Fleet managers, maintenance supervisors, and truck operators across North America have capitalized on our durability and best-in-class lifting capability.

READY TO MOUNT

Flexible mounting options and existing bolt patterns to mount to most any truck.

ENGINEERED EXCELLENCE

Rotac actuators are well known in the waste industry for their speed and reliability. Our extensive installations on the most demanding routes has ensured we are producing the highest quality product, capable of over 800 cycles per day.

HIGH TORQUE

The Rotac Tipper is capable of lifting 400 lbs. at 1,300 psi, the highest load vs. pressure in the industry, enabling fuel savings through reduced hydraulic pump pressure requirements.

Tipper actuator

The only cart tipper in the waste industry using a rotary vane actuator - one moving part means easy service and increased durability.
